Abstract not available for JP8512044T

Abstract of corresponding document: **WO9501159**

An organic or hydro-organic extract of fungi *Poria cocos* Wolf is used to prepare a cosmetic or pharmaceutical, and especially dermatological, composition for treating acne and greasy skin. In this context, the preferred concentration of the *Poria cocos* extract is 0.001-5 wt % on the basis of the total weight of the final composition. Cosmetic or pharmaceutical, and especially dermatological, compositions for treating acne and greasy skin may thus be prepared.
